| 12 mths | Measles Mumps Rubella Pneumococcal 13 Meningococcal ACWY |
| 18 mths | Diphtheria Tetanus Pertussis Hib Measles Mumps Rubella Varicella |
| 4 yrs | Diphtheria Tetanus Pertussis Polio |
| 10-15 yrs | Diphtheria Tetanus Pertussis HPV HPV |

49 Doses

Sources

1960 – Significant events in polio vaccination practice in Australia (1956)

1960 – Significant events in diphtheria, tetanus and pertussis vaccination practice in Australia (1953)

1975 – NH&MRC Immunisation Procedures

Although Smallpox vaccine was not widely used in young children in Australia in 1960 and 1975 some children would have also received a dose of this vaccine

1996 – Australian Standard Vaccination Schedule 1996 – ABS

2018 – 10th Edition Australian Immunisation Handbook – standard schedule from 01 July. Yearly flu vaccines are also recommended for all children. Indigenous and medically-at-risk children receive additional doses.
