

Letter B – Coercion into an Experiment

In response to my letter to you to provide me with details as to why you can mandate me to be part of an experiment where (evidence has now shown) I might potentially be injured or die you have suggested this is a performance issue.

Please provide full details of this.

If you are still determined to dismiss me I require you to confirm in writing that this is because I did not give my consent to be part of an experiment and have the experimental Covid Jab .
