

12 Reasons to Reject Vaccination

*1. New England Journal of Medicine: Chief Editor Marcia Angell MD., "It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgement of trusted physicians or authoritative medical guidelines." Also Lancet Chief Editor Richard Horton, "...much of the scientific literature, perhaps half, may simply be untrue... flagrant conflicts of interest...science has taken a turn towards darkness."

2. Manufacturers list vax ingredients as mercury, Simian (SV40) virus, cow fetus, insect cells, hydrochloric acid, monkey cells, aluminium, pig gelatin, aborted baby cells, squalene, cancer tumors, formaldehyde, sorbitol, etc. Vax contaminants include arsenic, tin, lead, cyanide and urea (urine waste).

3. Manufacturers warn vax 'side effects' include polio, encephalitis, cot death [SIDS], multiple sclerosis [MS], paralysis, cancer, autism, convulsions, meningitis, anaphylaxis and death. Claiming vax protect us from disease is contradicted as authorities report vaccinated patients can catch disease from - and also infect - both the vaxed and unvaxed. Impossible if vax work.

4. No vax has ever been scientifically tested (double blind, randomised, long-term, *inert* placebo study) to show: a) if vax work, b) safety, and c) which group is healthier. The U.S. Health Department was exposed in a landmark 2018 court loss after claiming for 32 years that vax were safe, despite having no proof and never once doing the legally required annual safety research ordered by Congress.

5. Vax ignores 18 lifesaving medical & legal requirements. Before any vax, the patient's current illness, age, allergies, medical history, weight, sex, race and medications should be examined and a risk-benefit analysis done. Your doctor must disclose ingredients, list harmful effects (up to 140/vax) & get informed consent. A written prescription is essential and must identify the doctor, patient (never groups) and list the disease, vaccine, dose and duration.

6. The main disease cause is toxemia/blood poisoning from ingesting drugs & irradiated, GE, artificial food/drink. Our bodies self-heal with pure water/air, exercise, sleep, fresh organic food, sun, fasting, rest: none offered by the trillion dollar medico/pharma industry. Such traditional laws of health/disease

contrast medical training based on suppressing and removing symptoms with perilous, costly, surgery, drugs, chemo, and radiation, not on understanding and teaching the above conditions our bodies need to eliminate toxins and self-repair. Our choices result in either vigorous health or chronic illness.

7. Autism exploded from 1 in 10,000 to 1 in 25 (2020) after MMR [Measles/Mumps/Rubella] vax began in the U.S. in '74. Drug Co. Sanofi Pasteur warned: 'Adverse events include autism.' Dr H. Wang, Dir. Special Needs Children, reported in 2005: 'The autism rate for Amish [who don't vax] in Ohio was 1 in 15,000.' In 2004 Centres for Disease Control [CDC] researchers found a huge rise in autism in African American boys by age 3 after MMR vax. Sen/Scientist Dr W. Thompson admitted his CDC team falsified and tried to erase this proof that vax causes autism. U.S. laws bar vax Co's being sued. In the tax-funded 'Vax Court', 83 trials found vax caused the autism.

8. A US Health Dept. study by Harvard Medical School found less than one percent of vaccine injuries/deaths are reported. Doctors & scientists who expose vax harm are vilified, defunded & persecuted: actions ignoring 200 years of medical disasters: thalidomide, lead, dioxin, childbed fever carnage [doctors refusing to scrub up], mercury, Prozac, Medical Journals endorsing smoking, ECT, asbestos, Vioxx, DES, lobotomy, fluoridation, etc. All were claimed, as are vax, to be safe & effective despite proof of injury and death to millions of people & multi-billions in public costs. In Australia, authorities reveal that every year, at least 18,000 deaths and 50,000 permanent injuries are caused by doctors, drugs, vax and in hospitals. Only we can decide if we or our children take drugs. This unalienable right is confirmed by S.51 xxiiiA of our Commonwealth Constitution.

9. Medicine and vax are based on a refuted theory about germs by Louis Pasteur who plagiarised [stole from] & misinterpreted the brilliant scientist Dr. Antoine Béchamp, who demonstrated disease is caused by toxemia: (a build up of metabolic waste/toxins). Professor/ Sir Alexander Ross MD., Fellow of the Royal Society of England, 'I do not question the existence of infinitesimal micro-organisms but they are the result, not the cause, of

disease. They are the scavengers; their legitimate work is to clean out the sewers of our bodies. Wherever there is decay, pus or decomposing matters, these little lifesavers are doing their work of neutralisation, sanitation and purification...'. Three crucial questions medicine has never reasonably answered; i. How can we have germs and not the disease they allegedly cause? ii. How can we have a disease but not the germs claimed to cause it? iii. How can germs mutate? e.g. change from smallpox to polio? The answer? Our bodies internally create bacteria to heal us. They do not attack healthy tissue. Without them the body would die.

10. Worldwide government statistics show diseases such as chickenpox, Flu, measles, polio, TB, smallpox, etc. were in major decline decades *before* widespread vax, due to improvements in hygiene. Medical historians record disease causes as rats, slums, fouled water (animal/human waste), diseased milk, malnutrition, poverty, polluted air, child labour and despair. Rectified with new building and labor laws, sanitation, isolation, cleaning, electricity, nutrition etc. Not vax.

11. A child's developing immune system is wired to benefit from mild diseases, establishing life-long immunity. By thwarting this developmental stage with vax, adult exposure to disease can be fatal. In declaring vax 'unavoidably unsafe', the US Congress confirmed that as there are no *guaranteed* vax benefits, all vaccines are experimental.

12. Every vax injects and infects us with diseases. Thus disease epidemics occur almost exclusively in vaxed regions. Independent studies show the claim that "herd immunity" prevents epidemics if 95% of people are vaxed is a lethal error. England, 1871-72: with 98% of ages two to 50 vaxed with smallpox - 45,000 died of smallpox. Germany had 96% vaxed and 125,000 smallpox deaths. In 1940, Germany made Diphtheria vax compulsory. By 1945 diphtheria cases had soared from 40,000 to 250,000.
