

Facts:

- COVID-19 shots are **EXPERIMENTAL**. COVID shots may cause life-long injury and death, infertility, miscarriages, and birth defects, may alter human genetics, have not undergone adequate or complete safety testing, and have not been proven to stop infection or transmission.
- VAERS data released July 16/2021 by the CDC showed a total of 463,457 reports of adverse events from all age groups following COVID vaccines, including 10,991 deaths and 48,385 serious injuries between Dec. 14, 2020 and July 9, 2021.
- **COVID survival rate is ~99.85% for all ages.** Does the evidence justify mass vaccination with a rushed to market, inadequately tested, experimental vaccine?

Vaccine Mandates are **ILLEGAL**

Vaccine compliance elicited under threat of coercion, bullying, or suspension of rights and freedoms, constitutes an extreme bullying and coercion and is construed under Canadian Medical Law as a battery.

"Like any other medical treatment, the right to choose does not belong to the state; it belongs to the individual ..."

- Lawyer, Rocco Galati
